www.loopline-systems.com/de/about/careers

Loopline Systems bietet Unternehmen eine einfach zu implementierende Cloud-Lösung zur Steuerung von Feedback, Performance Management und Mitarbeiterentwicklung. Im Mittelpunkt der SaaS-Lösung stehen qualitativ hochwertiges Feedback, individuelle Potenzialentwicklung und Mitarbeiterzufriedenheit. Denn jede Weiterentwicklung startet mit konstruktivem Feedback. Das 2014 gegründete Unternehmen ist eine Ausgründung aus Project A Ventures und eingebunden in das Experten- und Start-up- Netzwerk des Berliner Frühphasen-Investors und Company Builders.

You love to build great software? You are passionate about clean-code? We are seeking for a Senior Frontend Developer who is passionate about writing great software.

Senior Frontend Developer (f/m)

- Stelle
- Einsatzort: Deutschland, Berlin

- Berufsfeld: IT & Telekommunikation
- Festanstellung

Ihr Aufgabengebiet

- What we offer

    - You will become part of a highly motivated, professional and friendly team
    - You gain the opportunity to experience and leave your mark on the growth of a recently founded company
    - You will work in an ambitious environment with a strong focus on personal growth and open communication
    - You can contribute your own ideas and develop your skills further
    - Friendly working hours, we are flexible to accommodate your needs
    - Nice perks including free coffee and drinks, fresh fruits and regular team events

  Your Responsibilities

    - Writing automated unit and End-to-End tests will be crucial part of your workflow
    - Collaboration with designers will happen using an automated style guide
    - Nothing is made in stone, so you will make day to day decisions in terms of application architecture and technology stack
    - Improving your skills by doing constant code review
    - Gaining tremendous insight into advanced JavaScript (AngularJS)

  Your Profile

    - You have minimum 2 years’ experience with creating a structure for larger-scale websites/application
    - You already gained experience in working with single page application frameworks (AngularJS, React etc.)
    - You know the importance of semantics and accessibility
    - You are familiar with BEM and like to write CSS that stays maintainable at big scale
    - You enjoy working with bleeding-edge front-end technologies
    - You like to teach and share your knowledge

- You have experience with automation tools like Gulp and npm scripts
- Arrow functions, destructuring and spread operators are nothing new for you
- You are creative and have a sense for good design and user experience
- Experience with AngularJS is a plus
